APPLICATION ENGINEER

ARE YOU INTERESTED IN WORKING WITH 3D-SIMULATION AND MOTIVATED TO PUSH THE BOUNDARIES OF SIMULATION APPLICATION DEVELOPMENT? THEN YOU MIGHT BE INTERESTED IN THE FOLLOWING OPEN POSITION.

We are looking for an Application Engineer to enlarge our international team. You would take care of our end user training, customer support and take part in the realisation of customer projects. Developing simulations, training material and documentation would be essential parts of your daily work.

You are graduated or are about to graduate from Production Engineering, Automation Technologies or Computer Science. You both write and speak fluent English and are a customer oriented person who shows patience in explaining complex matters. You are comfortable speaking in front of small groups.

This position requires a certain amount of travelling in Finland and abroad.

REQUIREMENTS

- Fluent English, both written and spoken
- Programming experience is needed (basic C# and Python are considered an advantage)
- Customer orientated
- Independent and problem-solving skills
- Knowledge of Visual Components Product Suite will place you at the top of the list

WE OFFER

- Excellent multi-cultural working environment
- Learning and growing opportunities

MORE INFORMATION

For more information, please contact Ricardo Velez, tel. +358 405936434. Please send your application, CV and contact information to career@visualcomponents.com. The final application deadline for this position is 31.01.2012.

Visual Components Oy is a world leading 3D simulation and visualization software specialist. With a new generation of simulation products Visual Components offers machine builders, system integrators and companies using complex turnkey manufacturing solutions a simple, quick and highly cost effective way to build and simulate their complete production lines. Now with the help of 3D simulation, it is possible for industrial firms to implement new production lines faster and more cost effectively with improved profitability. Visual Components Oy was established in 1999 and operates from Espoo, Finland with the support of a global partner network.
